**Subject:** Latest draft of the procedure for ST 1  
**Date:** Wednesday, April 08, 2015 3:44:43 PM  
**Attachments:** [Operation Outline for ST 1 Mod 4.docx](#)

---

Brian, Gary and Chuck:

I had quite a bit of input and discussion from the last modification here at the site. Gary Jones participated in some of the discussions. I have drafted up another version of the operation outline after review from the OSC. Please review the procedure, if you require modification please outline those concerns or modifications. We discussed slurring the material in the tank but that method was ruled out due to the nature of the material and additional waste generation. The OSC told me that the fire hydrant water is potable and is suitable for decontamination. Please provide a specific JSA for this operation. Please provide specific staffing requirements and pricing for labor and equipment outside of our existing agreement, such as the rescue team. Please call me if you have questions.

LeRoy
